

The news from Nintendo of America Inc. continues to be e-mazing. This week, Nintendo issued new sets of e-Reader cards that bring enhancements previously unavailable to three hot games for the Game Boy® Advance SP.

Just connect two Game Boy Advance hand-held systems and slide the cards through an e-Reader while playing *Pokémon® Ruby*, *Pokémon® Sapphire* or *Super Mario® Advance 4: Super Mario Bros.® 3* to activate the special bonuses while playing. The compact size of these power-packed cards – and an MSRP of just \$5.99 for each set – make these ideal stocking stuffers and holiday gifts.

- *Pokémon® Battle-e* cards: With 2.5 million *Pokémon® Ruby* and *Pokémon® Sapphire* games sold, players will find that using *Pokémon Battle-e* cards allow them to battle new Trainers and receive exclusive berries.
- *Super Mario® Advance 4: Super Mario Bros.® 3-e* cards: These cards allow players to play new levels that don't exist in the game pack, use special power-ups and learn strategic techniques within *Super Mario® Advance 4: Super Mario Bros.® 3*, the hand-held version of the best-selling game of all time, *Super Mario Bros. 3™*.

The Game Boy Advance has sold more than 15.3 million in the United States and more than 37 million worldwide since it debuted.
